Shree Radhey – Bringing Quality and Traditionality to Your Daily Ritual.

A leading producer of dairy products, Shree Radhey has always been superior in quality and traditionality of their products and practices. Shree Radhey offers a healthy alternative to people who are unable to digest regular Ghee found in the market. A pioneer in the country's natural food industry, Shree Radhey has won multiple awards for its premium quality standards including certification from Food Safety and Standards Authority of India (FSSAI).

Shree Radhey is a brand known for its plentiful opportunities it has

created for the local women of the region. Our goal is to serve you with nature's best and support an ideology of job creation for rural women and economic upliftment of their families.

Why Shree Radhey Products?

Shree Radhey is a brand that promotes organic farming and products to protect your health and environment. We follow the natural breeding process only for our cows. No artificial insemination is done. We do not use any synthetic fertilizers, urea, pesticides, and additives to artificially increase production or size/shine of produce.

At Shree Radhey you will find 100% organic products. Stay Healthy, Stay Fit. Choose Shree Radhey Ghee.

HAND CHURNED

Our ghee is hand churned using Bilona Method. The traditional way of churning is what makes our **A2 Ghee** incomparable to other ghee available in the market.

UNADULTERATED GHEE

ShreeRadhey's Ghee is nutritious, healthy, pure and unadulterated. The farms are monitored and controlled under our eye from where the raw materials are acquired. The natural breeding process is followed in the growing process of calves to a mature cow without the use of artificial interference.

OMEGA 3

Our Ghee is a rich in Omega 3 fatty acids and Omega 6 fatty acids. These acids present in ghee helps in increasing the lean body mass and reduces fat mass.

ORGANIC SOURCES

The quality of our products is controlled under strict parameters and independently verified. We don't use artificial fertilizers or additives in our food.

What Our Customers Say ?

I really like that how this company is able to ship internationally and provide quality Indian cow ghee. I don't see any issues with the ghee itself but being in this industry I would give additional star if they followed ancient Ayurveda recommended Dohan practice for milking.

ANKIT AGARWAL

It's real ghee made by the traditional way. The ghee is so perfect that it is not completely solidified inside the house around 69 degree F. The taste is amazing with typical indian ghee smell. The texture is coarse just like home made indian ghee. The best.

Happy International Buyer

The Farm

Our farm is spread across acres of land where we extensively grow Natural and Organic Fruits and Vegetables. We also deal in the natural breeding of cows and produce Ghee. Our farms are inspected by third-party accredited certifying bodies as per Indian and International organic standards ensuring that all organic farm practices are followed.
